OIL-Aabsorb

EMULSIFIER SAPONIFIER

**NON-TOXIC – BIODEGRADABLE - LEAVES NO
RESIDUE**

Golf course superintendents have relied on OIL-AABSORB, more than any other product, to treat hydraulic spills.

When used as directed **OIL-AABSORB** makes petroleum and vegetable oil products water soluble and keeps them in solution while quickly and safely removing them from any surface, including turf.

(Works on all types of oil, including synthetic.)

DIRECTIONS FOR TREATMENT OF OIL SPILLS ON TURF:

It may be helpful to turn sprinkler system on immediately after spill to cool the turf down, before using the **OIL-AABSORB**.

Dilute 1 part **OIL-AABSORB** with 8 parts water, in a pump or garden sprayer. Spray mixture on spill, saturating thoroughly. Allow to stand 1 - 2 minutes, then flood or saturate the area using a slow steady flow of water. Allow the water to sink in to spill area to wash oil away from the roots of the turf.

AVOID USING HIGH PRESSURE

(OPTIONAL)

After watering in **OIL-AABSORB**, the use of **BIO-AABSORB MICRO-N** is recommended to remediate the soil and help stimulate the re-growth of turf.

**OIL-AABSORB CONTAINS NO BUTYLS, PETROLEUM SOLVENTS OR
PHOSPHATES.**
