

MINI-TOPPER

The Mini-Topper is equipped with adjustable front & rear brushes, to easily control the flow rate of materials

Virtually any area of natural grass can benefit from an application of good rich organic topdressing soil at least once a year.

The Bannerman **Mini-Topper** is designed to apply topdressing evenly on small to medium sized high wear turfgrass areas or residential lawns. The

spreading drum is wheel driven and has a spreading width of 24".

You can also spread composted manure, peat moss, or vermiculite. The capacity of the **Mini-Topper** is approximately 2 bushels. Topdressing turfgrass areas after overseeding will help to ensure faster growth and thicker, healthier grass plants.
