

2150T Commercial Tow Broadcast Spreader

Description

For those particular about applying granular material with a garden tractor look for the 2150T, the first true commercial tow behind spreader that has a manageable capacity and stores easily. Pulling this across the lawn at a comfortable 3-4MPH will insure proper material application. The included extended tongue will allow it to fit all the tractors on today's market. Our patented EV-N-SPRED[®] 3-hole drop system will allow for balanced spreading of all types of granular material. The 2150T is a true small application tow-able work horse.
