

2170T Commercial Tow Broadcast Spreader

Description

If you have a large area that you cover with your garden tractor than the 2170T is the best fit for your needs. It has the higher capacity to limit stops to fill up and get the job done in a timely manner. This true commercial tow spreader will provide even product distribution with our EV-N-SPRED[®] 3-hole drop system will allow for balanced spreading of all types of granular material. With the included tow hitch extension, the 2170T will fit all the modern tractors on the market today. The 100lb/45kg capacity rustproof poly hopper will provide years of trouble free use and make the 2170T one the most widely used tow spreaders by both commercial users and homeowners alike.
