

C24HDS Stainless Steel Professional 100lb/45kg Broadcast Spreader

Description

The C24HDS is the industry's **Premier** Professional broadcast spreader. Where extremely fine application rates are required, the C24HDS achieves unsurpassed accuracy of both the rate of application and the balance of pattern. The top of the line C24HDS brings high technology spreading to push spreaders. The C24HDS applies grass seed, fertilizer, and all other types of granular lawn and garden products with ease and efficiency. Equipped with the EarthWay EV-N-SPRED® **Control Center** and the EV-N-SPRED® PRO Dual Port Adjustable Shut-Off System, the user can infinitely balance the spread pattern based on material size, weight, and flight characteristics from the comfort of the upper handle. The C24HDS takes accuracy to the next level. Utilizing the EarthWay Twin-Tube chassis, the C24HDS has a 250lb/113kg load bearing capacity. The heavy-duty axle support system uses a specially engineered material that creates a smooth bearing surface for the axle, and is maintenance free. The EarthWay Super-Duty gearbox strength and high speed is unsurpassed. The C24HDS pushes effortlessly over any terrain, the solid linkage, 3-position height adjustable ergonomic handle provide total operator control and comfort. Equipped with a rustproof poly hopper, the C24HDS will give years of superior performance. The C24HDS embodies all the characteristics of the C24HD series with the added features of our **Control Center** and stainless steel chassis. The C24HDS is the most technologically advanced, easiest to use spreader on the market.

Features

- EV-N-SPRED® Control Center for all spreader controls high on the handle for the ultimate control
- 100lb/45kg Hopper capacity – rustproof poly construction
- 250lb/113kg Load bearing capacity - what the frame will support
