

# ARTIFICIAL TURF

**VERTI-  
TOP**

Regular maintenance of artificial turf is necessary to keep playing surfaces clean, bacteria-free and allow water infiltration. The Verti-Top employs a highly effective synthetic rotary brush to remove debris and toplayer infill from the turf, then sifts the debris out in a unique vibratory shaker which redistributes the clean infill back on the field. Finishing the work is a rear lag brush, leaving a clean and smooth playing surface.

# VERTI-TOP

The Verti-Top when used on a daily basis will keep your fields in pristine condition and free from undesirable debris.

## WORKING SPECIFICATIONS

Working Width	59" (150 cm)
Weight	749.5 lbs (340 kg)
Tractor recommended	25 hp (18.6 kW) with 992 lbs (450 kg) lift capacity
Dimensions	66.9" x 55.1" x 25.5" (170 cm x 140 cm x 65 cm)

## FEATURES / BENEFITS

FEATURE	BENEFIT
rotating brush	lifts debris from the surface
filtering system	redistributes clean material
rear fixed brush	incorporates material back into the turf
light weight	can be used for daily or weekly maintenance
simple design	easy operation on any synthetic field surface
