

ALL CLEAR®

SPRAY TANK DECONTAMINATOR

KEEP OUT OF REACH OF CHILDREN WARNING

First Aid: If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. **If in Eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. **If Swallowed:** Call a poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. **If Inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

General Information: ALL CLEAR is specially formulated to remove pesticide deposits and other debris, including oily substances, from tanks, hoses, booms, filters, screens and nozzles. ALL CLEAR was developed to handle difficult to clean chemicals (sulphonylurea herbicides and sticky formulations). ALL CLEAR will neutralize and solubilize phenoxy herbicides and solubilize sulphonylureas.

Use Rates:

General purpose cleansing (0.25% v/v)

1 quart (32 fl. oz.) per 100 U.S. gallons
250 mL per 100 L
1 Tbsp./gallon

Decontamination (0.50% v/v)

2 quarts (64 fl. oz.) per 100 U.S. gallons
500 mL per 100 L
2 Tbsp./gallon

Cleansing Procedure:

1. Immediately after spraying, drain tank, hoses and boom completely. Remove nozzles and screens from boom. Any contamination on the outside of spraying equipment should be removed by washing with a fresh solution of ALL CLEAR and water. (50 mL per 10 L / 1.6 fl. oz. per 2.5 U.S. gallons / 2 Tablespoons per 1 U.S. gallon.)
2. Rinse inside of tank of visible residues with clean water and flush through hoses and booms, using at least 1/10th of spray volume. Drain tank completely.
3. Half-fill tank with clean water and add ALL CLEAR at the selected rate. Agitate and flush the hoses and

boom with the cleaning solution. Fill with water making sure the tank is completely full and allow to stand for 15 minutes with agitation. Again flush the hoses and boom and drain the tank completely. *

4. Nozzles, screens and filters should be cleaned with a fresh solution of ALL CLEAR and water. (50 mL per 10 L/1.6 fl. oz. per 2.5 U.S. gallons/2 Tablespoons per 1 U.S. gallon.)
5. Rinse the tank with clean water and flush through the hoses and boom. Drain tank completely.
6. Spray rinsate on site approved for the pesticide being removed from the spray tank or by other procedures approved by appropriate authorities.
7. Sample of final rinsate may be applied to a susceptible plant to ensure total decontamination.

*NOTE: IF it is not possible to drain the tank completely, step 3 must be repeated before going on to step 4.

For additional information, refer to "A Guide to Application Equipment Cleanout (ref. H-42769) for DuPont Sulphonylurea Herbicides" by DuPont Chemical Company.

Reduced volume method for step 3. Refer to DuPont information for reduced volume cleanout procedure for large sprayers or add sufficient water plus selected rate of ALL CLEAR to provide adequate agitation and movement in the tank. Spray must contact all interior surfaces.

Storage: ALL CLEAR may separate if stored at high temperatures (85°F/29°C). Separation will not affect performance. Shake well before use. Store in cool, dry place. Store in original container. Keep tightly closed. Do not reuse empty container.

Disposal: Do not contaminate water, food or feed by storage or disposal. Offer container for recycling or dispose of container in sanitary landfill, or by other procedures approved by appropriate authorities.

WARRANTY DISCLAIMER AND NOTICE

THE DIRECTIONS FOR USE OF THIS PRODUCT ARE BELIEVED TO BE ADEQUATE AND SHOULD BE FOLLOWED CAREFULLY. IT IS IMPOSSIBLE TO ELIMINATE ALL RISKS INHERENTLY ASSOCIATED WITH THE USE OF THIS PRODUCT.
